## Construction Supervisor (82020)

### Description

Supervisors in mining and quarrying supervise and coordinate activities of workers engaged in underground and surface mining operations and quarries. They are employed by coal, metal and non-metallic mineral mines and quarries.

### Responsibilities

### Job duties

Here are some of the main activities and tasks that Supervisors, mining and quarrying have to perform, and some of the physical demands they involve:

- Supervise, coordinate and schedule the activities of workers who extract coal, minerals and ore; operate underground conveyances; and perform other services in support of underground mining, or of heavy equipment operators, drillers, blasters and other workers in surface mining and quarrying
- Establish methods to meet work schedules and confer with managerial and technical personnel, other departments and contractors to resolve problems and coordinate activities
- Oversee the safety of the mining or quarrying operations
- Resolve work problems and recommend measures to improve productivity
- Requisition materials and supplies
- Train workers in job duties, safety procedures and company policies
- Recommend personnel actions such as hirings and promotions
- Prepare production and other reports.

### Qualifications

## Employment requirements

This is what you typically need for the job.

- Several years of experience in the occupations supervised are usually required.
- Provincial certification as an underground mine supervisor, shift boss, or coal mining supervisor may be required.
- Completion of a college or university program in mining technology or engineering may be required for some positions in this group.
- Completion of secondary school is required.
