## Construction Supervisor

### Description

### Description

Supervisors in mining and quarrying supervise and coordinate activities of workers engaged in underground and surface mining operations and quarries. They are employed by coal, metal and non-metallic mineral mines and quarries.

### Responsibilities

### Job duties

Here are some of the main activities and tasks that Supervisors, mining and quarrying have to perform, and some of the physical demands they involve:

- Supervise, coordinate and schedule the activities of workers who extract coal, minerals and ore; operate underground conveyances; and perform other services in support of underground mining, or of heavy equipment operators, drillers, blasters and other workers in surface mining and quarrying
- Establish methods to meet work schedules and confer with managerial and technical personnel, other departments and contractors to resolve problems and coordinate activities
- Oversee the safety of the mining or quarrying operations
- Resolve work problems and recommend measures to improve productivity
- Requisition materials and supplies
- Train workers in job duties, safety procedures and company policies
- Recommend personnel actions such as hirings and promotions
- Prepare production and other reports.

### Workplaces and employers

Here are the typical workplaces where Supervisors, mining and quarrying are employed and some of their main characteristics:

- Quarries
- Coal, metal and non-metallic mineral underground mines

### Qualifications

### Employment requirements

This is what you typically need for the job.
